FOREWORD

It has been a decade since Volume I of the Saudi Arabian Stud Book (SASB) was issued. Many constructive steps have been achieved since then, the complete transition to DNA parentage and the breeders' understanding of the economic value of the Stud Book have contributed to a steady growth of the Thoroughbred population in the Kingdom. This has ignited the interest of the multinational and giant national companies to support racing, resulting in an increase in the number of races as well as an increase in purses.

Consequently, the number of all Thoroughbreds has increased across the board. The stallion roster has risen to over 200, active broodmares now number in excess of 1300, and every year the foal crop is breaking the previous year's record, now close to 1000 for 2008. Now, all registrations are computerized and we are getting very close to registering the great majority of all foals in the same year of foaling.

The presence and success of Saudi bred horses on the international stage is growing rapidly, and last year for the first time in the history of the Saudi Arabian Thoroughbred we had major international owners sending their representatives to purchase from Saudi sales.

Our first decade has been one of construction and we will be working vigorously during the second decade to ensure it will be one of further improvement taking the Saudi Arabian Stud Book forward in the future.

Equestrian Club
Saudi Arabian Stud Book
July 2009

SAUDI ARABIAN THOROUGHBRED STUD BOOK

RULES AND REGULATIONS

1. ELIGIBILITY:

1.1 To be eligible for entry into the Saudi Arabian Stud Book the horse must:

1.1.1 Be the product of a mating between a sire and dam both of which are recorded in a Thoroughbred Stud Book approved by the International Stud Book Committee.

OR

1.1.2 The horse must prove satisfactorily eight recorded crosses consecutively with horses as described in 1.1 including the cross of which it is the progeny, and that its promotion to Thoroughbred status is unanimously approved by the International Stud Book Committee.

1.2 Although, a horse may qualify under 1.1 above, the Saudi Arabian Thoroughbred Stud Book (SASB) has the right to refuse to record a horse in its Stud Book if the horse cannot prove satisfactorily eight recorded crosses consecutively (including the cross of which it is the progeny) with horses described in 1.1.1 and 1.2.1, but such refusal shall not be effective unless it is confirmed by the unanimous decision of the International Stud Book Committee.

2. REGISTRATION FOR BREEDING:

2.1 Before any thoroughbred stallion or mare can be registered in the SASB as breeding stock the animal's identity must be established. This is achieved by:

- a) The completion of a registration form issued by the SASB, recording the animal's registered name, colour, age, pedigree, present owner and previous history so far as known.
- b) The provision of current markings of the animal, taken by a veterinary surgeon.
- c) The establishment of the DNA profile or bloodytype of the animal. In respect of all animals this will require the provision of a current blood sample taken by a veterinary surgeon except for broodmares whose bloodytype has been officially established, unless for reasons of doubt or incompleteness a current blood sample of the mare is considered necessary. It is a condition of import that the horse's DNA profile or bloodytype, as taken at initial registration, is provided by that horse's country of origin and sent directly to the SASB on request.

2.2 In the case of all animals which have been imported, an Export Certificate identifying the animal, and issued by the Stud Book Authority

of the animal's country of birth, must be received from the country of export. For imported animals visiting Saudi Arabia for less than nine months the requirement of the provision of an Export Certificate may be replaced by the lodgement of the animal's identity document issued by the Stud Book Authority (SBA) with which it was registered and currently endorsed by the relevant authority of the country from which it has travelled.

- 2.3 No animal may be registered as breeding stock retrospectively, after it has died, except at the discretion of the SASB and only if the animal's DNA or blood type has been officially established prior to the animal's death.

3. OWNERSHIP

- 3.1 For every stallion or mare registered as breeding stock the name and address of the animal's owner must be lodged with the SASB.

3.1.1 This requirement is necessary for the purpose of administration and in the case of a Broodmare for the recording of the breeder of the foal. It should not be construed that the records maintained by the Saudi Arabian Stud Book give the applicant legal title over the horse.

3.1.2 For the purpose of these Conditions of Entry the breeder is the person or entity who has been recorded as above as being the owner of the mare at the time that her foal was dropped.

3.1.3 Owners of breeding stock are obliged to contact the SASB to prove details of any changes of ownership.

4. FOAL REGISTRATION

4.1 Breeding Returns

4.1.1 For the produce of a mare to be registered in the SASB the following requirements must be met:

4.1.1.1 A microchip approved by the Saudi Arabian Stud Book must be inserted subcutaneously in the neuchal ligament in the left or near side of the foal, approximately 2 inches below the mane, by a veterinarian authorised by the SASB or the Equestrian Club of Riyadh.

4.1.1.2 An official Certificate of Covering must be received by the SASB, completed and signed by the stallion owner confirming all dates of covering in the previous breeding season, and confirming the stallion owner's satisfaction as to the correct identity of the mare and declaring that the mare was served naturally and that artificial insemination, embryo transfer, cloning or any other method of genetic manipulation was not used. If the broodmare was covered by two or more stallions a separate certificate for each stallion is required.

4.1.1.3 An official Foal Registration form completed and signed by the Breeder giving the required details of the produce, namely the colour, sex, date of

birth and country of foaling must be lodged. The birth of twins must be indicated.

4.1.1.4 A Foal Identification Certificate stating the parentage, colour, sex, date of birth of the produce completed by the Breeder, and showing a written and graphic description of the markings of the produce, prepared signed and dated by a veterinary surgeon.

4.1.1.4.1 Markings should be taken **before the foal is four months old** and as near as to this deadline as possible.

4.1.1.4.2 A minimum number of identifying features is required. Identity certificates should incorporate both a narrative, typed or completed in block capitals, and a graphic description.

4.1.1.4.3 DNA and blood samples from the Foal, and where necessary, the broodmare and stallion, each taken by a certified veterinarian, to confirm that the mare and stallion qualify as the parents of the foal by DNA or blood typing. DNA and bloodtype information is not made public but is supplied on demand when a horse is exported to the Stud Book Authority (SBA) of the importing country.

4.1.1.5 Payment of the relevant foal registration fee.

4.1.2 In the event of no live produce the official Foaling Report must still be completed indicating whether the broodmare was barren, aborted early or slipped, or that the produce was born dead or has died. A return should also be lodged if the mare was not covered in the previous season. Failure to report this information will result in the term "No Return" appearing on the broodmare's produce line for that year in the SASB. The owner should also notify the SASB if the broodmare has died.

4.2 Incomplete Returns

4.2.1 Returns which are incorrect or incomplete, or which lack any of the required supporting documentation, cannot be accepted and will be returned to the Breeder for completion.

4.2.2 The rate of fee payable for registration of produce will be the rate in force on the date when the completed return is received.

4.2.3 Produce for which a completed return has been made in all respects except the provision of required DNA or blood samples will be accepted at the fee applicable on the date the return is received, provided that the necessary DNA or blood samples are received within two months from that date. If the required DNA or blood samples are not provided within two months, the return will not be accepted and will be returned to the breeder for completion, and will only be accepted under the provisions of the first two paragraphs of these conditions.

4.3 Service to produce an eligible foal

- 4.3.1 A foal is not eligible to be recorded in the SASB unless:
- (a) It is the product of a natural service or covering which is the physical mounting of a thoroughbred mare by a thoroughbred stallion. Any horse that has been the product of artificial insemination, embryo transfer, cloning or any other form of genetic manipulation is not eligible for registration.
 - (b) A natural gestation took place in and delivery was from the body of the mare in which the foal was conceived.

4.4 Recording of coverings

4.4.1 The SASB issues Covering Certificates to every Stallion owner.

4.4.1.1 Stallion owners are required to:

4.4.1.1.1 Enter on the Certificate details of the covered broodmares with all required information and declarations. In particular, if a broodmare is covered by more than one stallion, a separate certificate must be completed for each stallion.

4.4.1.1.2 Issue a Covering Certificate to the Owner of each mare covered by their stallion.

4.4.1.1.3 Return to the SASB the completed counterfoils and remaining Covering Certificates by the 30th September in the year of covering.

4.4.1.1.4 Certify that the mating was a natural covering and did not involve the process of artificial insemination, embryo transfer or transplant, cloning or any other form of genetic manipulation.

4.4.2 If a Stallion Owner does not follow these instructions, and in particular if they do not return completed counterfoils to the SASB, the stallion cannot be registered for following seasons

4.5 Life number

4.5.1 All registered foals are issued with a unique international identification number (LIFE NUMBER) at the time of registration. This number is comprised of a three character prefix to identify the country of birth (KSA), followed by eight numeric digits.

5. IDENTIFICATION DOCUMENT - PASSPORT

5.1 A Passport is issued in respect of each horse registered in the SASB. The passport is the basic identifying document of the animal for which it is issued. This document shows descriptive particulars registered in respect

of the animal including details of the breeder, the owner, the microchip number as an aid to identification, a vaccination record and details of all export/import movements.

- 5.1.1 The passport is not a certificate of ownership and does not convey legal title of the horse to the holder.
- 5.1.2 The passport remains the property of the SASB and must be returned to the SASB on demand.**
- 5.1.3 The SASB officially endorses the appropriate section of a stallion or broodmares passport to confirm that they are registered as breeding stock.
- 5.1.4 All entries and changes to a passport can be only made by a person so authorised by the SASB or the Equestrian Club of Riyadh, who confirms the amendment with a signature and rubber stamp.
- 5.1.5 Registered broodmares can only be covered after the broodmare's owner shows the broodmare's passport to the stallion's owner. The stallion owner must check the broodmares identity which he confirms with his signature on the Certificate of Covering.
- 5.1.6 Whenever a broodmare or stallion changes hands the passport must be returned to the SASB for endorsement with the details of new owner.**
- 5.1.7 The SASB should be advised if a horse has acquired markings.
- 5.1.8 In the case of a passport being lost or mislaid the owner of the horse must submit a letter confirming the facts. The SASB will issue the owner with a duplicate.

6. NAMING:

- 6.1 All Thoroughbred horses that have been foaled in Saudi Arabia must have their name registered with The Equestrian Club and recorded with the SASB. The suffix (KSA) is part of the name of any registered thoroughbred horse foaled in Saudi Arabia. Applications for the naming of any foreign bred horse must be submitted to SASB who will apply to the Racing Authority of the horse's country of birth for the availability of the name.
 - 6.1.1 When naming a horse the following Rules in compliance with the International Agreement on Racing and Breeding will apply: -
 - (a) It is not permitted to use the names of stallions, which have been used for covering, until a period of 15 years has elapsed since their death or last recorded covering year or 35 years of age have been attained (whichever is the soonest).
 - (b) It is not permitted to use the names of mares, which have been used for covering until a period of 10 years has elapsed since their death or last

recorded covering year or 25 years of age has been attained (whichever is the soonest).

- (c) It is not permitted to use the names of non breeding stock until a period of 5 years has elapsed since their death or 20 years of age has been attained (whichever is the soonest).
- (d) Names cannot be used that are on the International List of Protected Names; this includes the names of famous stallions and mares and of the best racehorses of the countries participating in the agreement.
- (e) Names cannot be more than 18 characters (including signs and spaces).
- (f) It is not permitted to use the name of a public person, unless permission is given by them or their family.
- (g) It is not permitted to use a name whose spelling and pronunciation is close to a name already registered.
- (h) It is not permitted to use names followed by numbers.
- (i) It is not permitted to use names made up of initials, figures, hyphens, full stops, commas, signs, exclamation marks, inverted commas, forward or back slash, colon and semi-colon.
- (j) It is not permitted to use names whose meaning, pronunciation or spelling may be insulting or obscene.
- (k) It is not permitted to use a name which starts with any sign other than a letter.

7. IMPORTS/EXPORTS

7.1 Imported horses

7.1.1 It is the responsibility of each owner/breeder or their representative to notify SASB every time a horse arrives at their stable/farm and to state from where the horse arrived.

7.2 Exported horses.

7.2.1 It is the responsibility of each owner/breeder or their representative to notify SASB every time a horse departs from their stable/farm and to inform SASB as to the destination, preferably before departure.

7.2.2 The SASB requires the receipt of a horse's passport prior to export for endorsement. Also, if the horse is to be exported for a period of greater than nine months then an application for the issue of an Export Certificate along with a current identity certificate of the horse is also required.

7.2.3 The passport should accompany the horse when it travels, after it has been endorsed by SASB. If the horse does not travel after the passport has been endorsed, then it must be returned to the SASB for cancellation of endorsement.

8. DNA & BLOODTYPING

8.1 The SASB requires that:

- (a) DNA and bloodtyping is only carried out by the laboratory appointed by the SASB for the purpose of verifying and identifying a horse.
- (b) All DNA and bloodtype details of all horses are kept confidential by Saudi Arabian Thoroughbred Stud Book and not divulged except to other Stud Book Authorities
- (c) Routine DNA or blood typing for parentage verification can only be used for the registration of horses in the Saudi Arabian Stud Book, and not used for retrospective parentage testing.

8.2 A DNA or blood type established by an overseas laboratory will be accepted only in the following cases:

8.2.1 Only if the animal concerned has died before a valid blood sample could reasonably have been taken from it, to establish the blood type of an imported broodmare or stallion.

8.2.2 In the case of stallions only, for the purpose of parentage testing a foal conceived abroad and imported in-utero provided that the DNA or blood type so established is considered sufficiently comprehensive for the purpose.

9. PUBLICATIONS

9.1 The Saudi Arabian Stud Book is published in full every four years with the Return of Mares supplements published annually.

LIST OF COUNTRY CODES

Listed below are the internationally agreed abbreviated suffixes that are used to denote the country of foaling when names are registered for horses foaled outside the Kingdom of Saudi Arabia.

ALG	Algeria	LUX	Luxembourg

INDEX

Within the following list are included those mares which have had no thoroughbred produce to live reported in the Kingdom of Saudi Arabia since the publication of Volume 2.

Letters are used to indicate the status of the mare as follows:-

- A. Mares that have died or have been put out of stud without further thoroughbred produce to live reported.
- B. Mares recorded in previous volumes which have had no thoroughbred produce to live reported.
- C. Mares which when sent to stud had no thoroughbred to live reported.
- D. Mares not covered which have died or been put out of stud.

SAUDI ARABIAN STUD BOOK BROODMARES WITH THEIR PRODUCE

A breeder is the person or entity who owns the dam when the foal is born.

The name of the breeder appears opposite the produce.

For each imported mare appearing as a broodmare in the Saudi Arabian Stud Book a reference is given in brackets indicating the Stud Book in which the mare's foaling was originally recorded. The following abbreviations are used:-

GSB	=	General Stud Book
Aus. S. B.	=	Australian Stud Book
Am. S. B.	=	American Stud Book
Am. S. B. foals of	=	American Stud Book Supplement
Am. S. B. (electronic)	=	The Jockey Club Website
Arg. S. B.	=	Argentinean Stud Book
Chi. S. B.	=	Chilean Stud Book
Fr. S. B.	=	French Stud Book
Ger. S. B.	=	German Stud Book
Ity. S. B.	=	Italian Stud Book
Nz. S. B.	=	New Zealand Stud Book
Per. S. B.	=	Peruvian Stud Book
Saf. S. B.	=	South African Stud Book
Tur. S. B.	=	Turkish Stud Book
UAE. S. B.	=	United Arab Emirates Stud Book
